This fall, the Virginia Cross-Sector Professional Development Team is coordinating three Practice-Based Coaching (PBC) Training Institutes. Practice-Based Coaching is an evidence-based cyclical process for supporting practitioners' use of effective practices that lead to positive outcomes for children and/or families. The Institutes are open to technical assistance and supervisory professionals who support early childhood educators through coaching.

The interactive two-day trainings consist of presentations, large group discussion, small group work, and practicing components of the PBC cycle.

Topics include:

- an overview of the PBC model
- strategies for developing collaborative coaching partnerships
- developing needs assessments, shared goals and action plans
- focused observations
- providing reflection and feedback

Registration is \$150 and includes lunch each day.
